CHUBB'S PATENT FUNNEL OR TUBE TOP.

Cut No. 1 is a longitudinal or sectional view of my patent Funnel Top, which is put together without the use of solder, by cutting a deep annular groove or seat on the inner end of the head; the small end of dowel is inserted in this groove, and is secured thereto by driving swedging tool into the center hole, which forces the metal outward, thereby flanging or spreading the inserted end of the dowel and securely fastening or dovetailing it in the annular groove. This top being put together wholly without the use of solder, can easily be removed from the tip of a fishing-rod, when necessary, by heating, without danger of unsoldering the top. This top is secured by Letters Patent No. 277,230, granted May 8, 1883. All parties are hereby warned not to manufacture the same, under penalty of the law.
