Fine handcrafted bamboo rods

Traditional Split Cane Fly Rods

Traditional handcrafted split cane bamboo rods. Tortoise shell flamed or blonde. All rods are tailor made to customer specifications. Choose your action, your silk wrappings, your reelseat type and shape of your grip.

Only the best materials are used in the rods. High quality nickel silver ferrules, reelseats and the best agate stripping guides and snake guides are used.

All rods are designed with personalized tapers. Most of my tapers are medium fast action but if you wish slower rod actions, this can be arranged.

Rods can be in two or three pieces with either one or two tips. Rod lengths from 6' to 8' .

Enquire about my hybrid rod: dry fly/nymphing and my light switch rod with removable fighting butt.

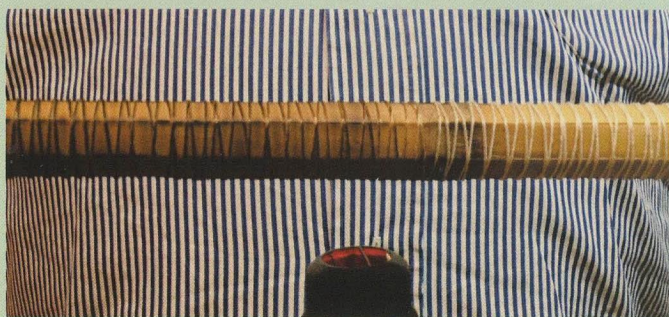

Moreno Borriero Bamboo Rodmaker

Rods are mostly hollow-built by scalloping.
Truncated ferrules are used to save weight.

Choose from light weight cap and band or
unlocking threaded barrel nickel silver reelseats.
